

Whole House Cabinetry Solution

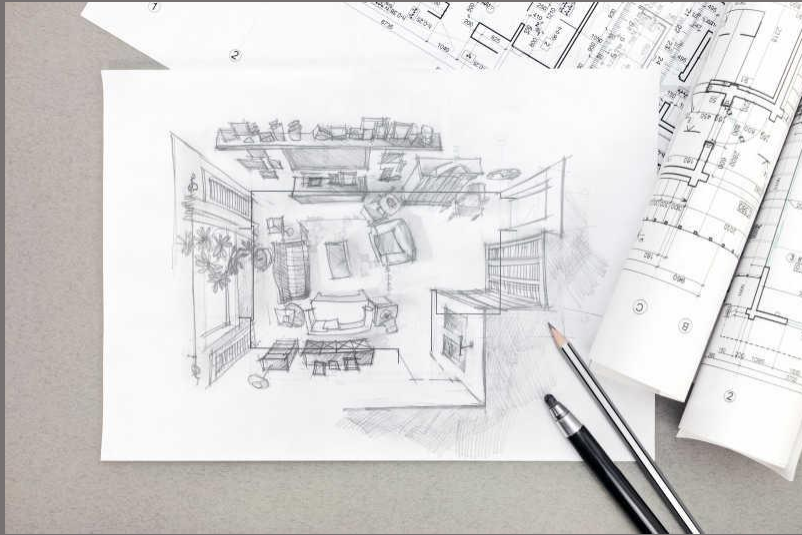

- Kitchen Cabinet
- Wardrobe
- Bathroom cabinet
- Living room
- Bedroom

Our factory aim on providing customized furniture including entire fitted kitchen cabinet, wardrobes, vanities and interior doors for residential house, apartment and hotel projects.

For any project, we produce a detailed scale drawing and 3D rendering, based on the architectural drawing or house layout. We customize the design to capture our client's requirements and continue to make changes and updates to the design until we achieve 100% customer satisfaction.

We can also help client on shipment, door to door delivery if needed.

• Design & Planning

- Based on your kitchen floor plan, our experienced designers will provide project suited, state-of-the-art and cost effective kitchen designs.

Advantage is the company's wide range of products and materials suitable for any room and any budget.

Visualization & Presentation

To give you an idea of how the kitchen as a room will look like, we produce the 3D rendering based on the shop drawing, using our sophisticated photo-realistic visual tools.

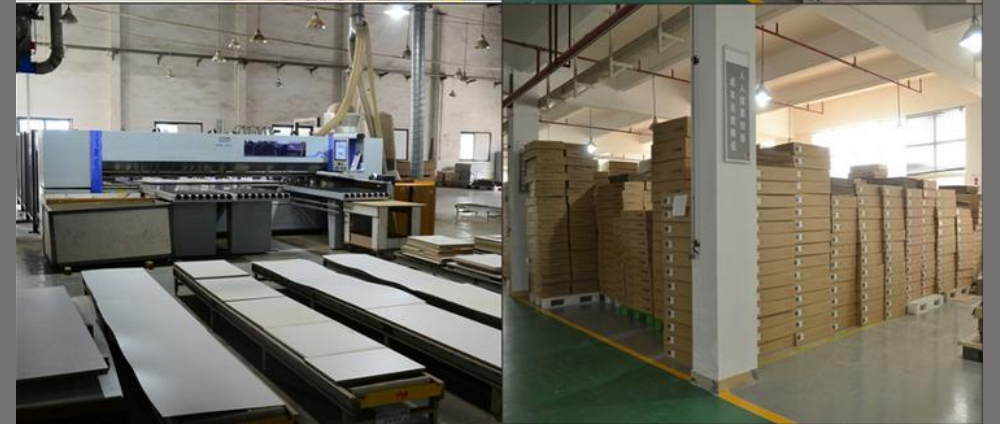

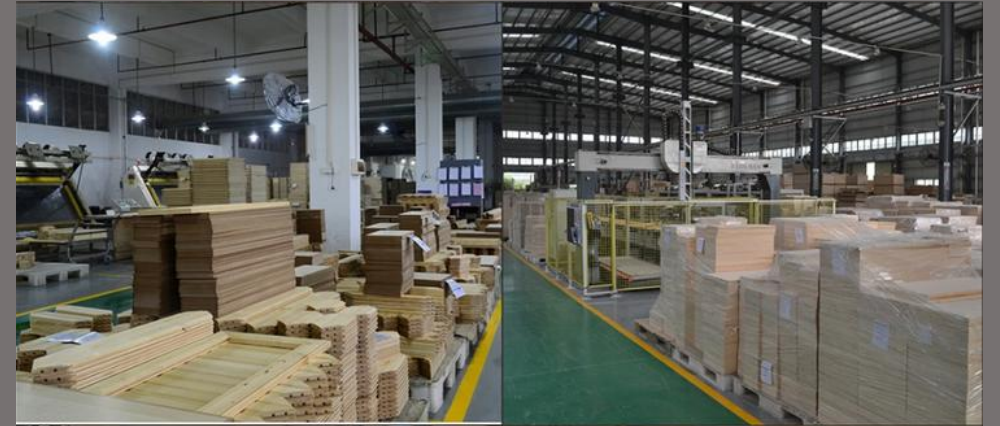

These can be used for client presentations and will convince even the most discerning buyer.

Logistics & Coordination

Based on site requirements, we provide the complete schedule for production and delivery to the site – just in time to avoid any unnecessary storage or coordination work on site.

We have trusted cooperation with the most experience forwarders in the region using innovative transportation and logistics technologies that optimize the complete supply chain and enhancing flexibility and profitability.

Global supply chain

We stick to high quality standard by cooperation with the most of the world-leading brands on hardware, edge banding and accessories.

- >Years of experience working with well known, detail-oriented homeowners and high-profile individuals.
- >Knowledge in working with builders, architects, interior designers and more.

kitchen

A classic gray kitchen is the representation of timeless elegance. Appearing on furniture and decor, this favorite neutral color is a popular choice for kitchens. It provides the perfect balance between warmth and neutrality.

Kitchen style

- When you are designing your dream kitchen, from cabinetry to lighting fixtures, there are plenty of decisions to make.
- First, you need to decide on the overall look of your kitchen-from modern to traditional styles-there are plenty of options that will inspire you to cook.

Modern kitchen

The popularity of black kitchens increases day by day and has become one of the most used color schemes for kitchens. Black is the subtle shade of elegance and sophistication. The overall look can run between cozy and elegant, dramatic and moody but always sophisticated.

Blue is the color of the sea and sky, and unlike the other colors, it acts as a neutral color and adds color without overwhelming.

Traditional Kitchen

Despite the rise of modern and contemporary kitchens, traditional kitchens are still one of the most popular design styles which offer charming and inviting spaces. Although traditional kitchens have a basic color palette, the key features of this style are details and embellishments. Traditional kitchens include details like beaded-board panels, legs, and pilasters on islands, crown moldings, quartz or granite countertops, and furniture-like pieces with embellishments.

Kitchen Layouts

When designing a kitchen, the kitchen layout is one of the most important factors to consider in creating a functional and practical kitchen.

Of course, we want our kitchens to look stylish and inviting but if your kitchen is not placed properly, your workspace will be restricted and an overwhelming environment will result. With the right kitchen layout, even the smallest spaces can be turned into a functional kitchen.

One-Wall Kitchens

This simple kitchen layout is a space saver. As the name suggests, the cabinets are placed on one wall which offers an open and airy look. This layout is generally found in studio or loft spaces because of its compact placement. If your wall width is limited you should consider the tall cabinets which help create extra storage space.

L shape kitchen

With this ergonomic layout, you can be more flexible in the location of workspaces. For a tip, you can place the sink and fridge on one wall and the cooker on the other wall to take advantage of the triangle.

The Island kitchen

Kitchen islands are probably the most popular elements of recent years. If the space is large enough, the island unit offers plenty of workspace and storage in the middle of the kitchen. In addition to its large workspace, it also provides a perfect space for family gatherings.

Galley Kitchen

wardrobe

Sliding wardrobe doors are a simple and stylish way of adding functional storage and maximising your space. From wardrobes in the bedroom, to cupboards in the hallway, our high-quality doors come in many designs to allow you to create simple storage solutions in any room.

Sliding door wardrobe

Up to ceiling Sliding door wardrobe

Discover an excellent selection of sliding doors in a variety of styles and colors, ideal whether you're fitting a new wardrobe or replacing your current door.

We also offer a wide range of mirrored sliding doors, wooden, paint finishes and many made-to-measure options. Get your bedrooms off to a great start with our design.

Mirror Sliding door wardrobe

Hinged wardrobes offer better visibility of clothes

It is easier to spot things when you open the doors as you get the entire view of the wardrobe. Unlike sliding doors, hinged doors do not conceal one side of the wardrobe.
